

## ELIMINATE MOBILE DISTRACTIONS

### ► How the Solution Works

Your choice of trigger (**OBD/JBUS, DriveID, 3rd Party Hardware**) identifies vehicle status

Enables Greater Knowledge, Feedback, Reporting & Scoring

#### DRIVING DATA

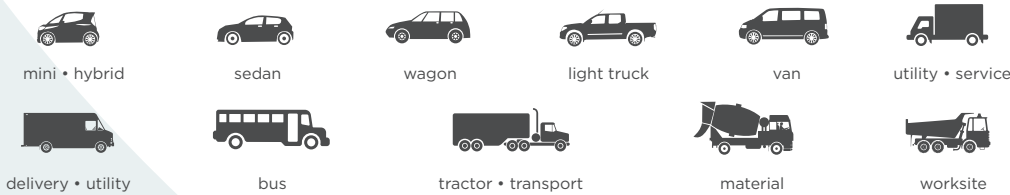

- Hard Braking Events
- Rapid Acceleration Events
- Mileage Information
- Idle Time
- Overspeed
- Trips
- Road Speed vs. Posted Speed
- Cornering
- GPS Data by-the-second
- Time of Day

#### DEVICE DATA

- Screen Locked/Unlocked
- Screen On/Off
- Driver/Passenger Identification
- Relative Sound Level
- Incoming/Outgoing/Active Call
- Handsfree vs. Handset/Speaker
- Blocking/Unblocking Mode
- Allowed Application Use

### ► Vehicle Compatibility

Cellcontrol works across all passenger and enterprise fleet vehicles. Installation is available as a stand-alone fleet safety system or directly integrated with most existing telematics applications.

### ► Customizable Management Console
