

Xerox® Healthcare Multifunction Printer Solution
Connected by Kno2™

Market Dynamics

- Healthcare is evolving at a rapid pace.
- Healthcare legislation is driving care coordination.
- The need to share patient information is critical.
- The result is improved patient outcomes.

Built for Healthcare

The Xerox® Healthcare MFP, connected by Kno2™, helps meet these challenges by solving the problem of secure sharing of patient information, from one provider to another, across the healthcare continuum.

Connect

Tightly integrated with the largest and most secure health information network in the United States. Connect and gain access to over a million providers.

Access

Your new access allows you to search for providers down the street or across the nation. Broaden the network by inviting other providers to begin sharing patient information, electronically and securely.

Share

Seamlessly share patient information across a HIPAA-compliant network to better coordinate care. It's as simple as sending or receiving a fax or email, but specifically designed for healthcare.

Make the Most of New Technology

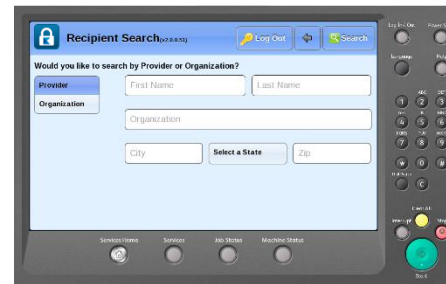

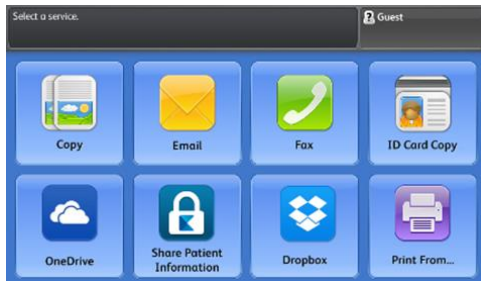

Easily share information with providers to better coordinate care right from the Xerox® Healthcare MFP.

Print → Copy → Fax → Scan → Share

More than just traditional print, copy, fax and scan functionality, your new Healthcare MFP enables you to **share** patient information in a secure and efficient manner by installing and activating the Share Patient Information application.

Mitigate HIPAA violation risk with just a click of a button.

Leverage similar workflow with better results:

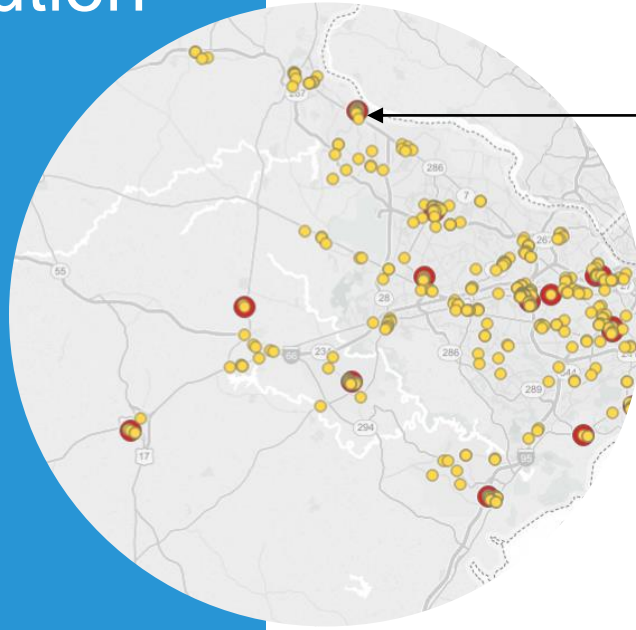

- Put your document in the feeder
- Select a provider or organization
- Select Share Patient Information

The process is the same, but the outcome yields a different result:

- HIPAA compliant
- EMR compatible
- Electronic exchange

Xerox® Healthcare MFP Solution

- Print
- Copy
- Fax
- Scan
- Share

Your MFP is **here...**

Your Healthcare
MFP can now
connect to all
other healthcare
organizations.

ConnectKey®

Secure from Start to Finish

Compliance with Standards

- HIPAA, Meaningful Use and others have set new standards for interoperability.
- They require increased security levels for the handling and exchange of all protected patient health information (PHI).

Powerful Partnerships

- Integrated with Surescripts®, the most secure health information network in the United States and an accredited, trusted framework through DirectTrust
- Equifax® services are used for identity verification
- ONC-HIT 2014 Edition Modular Certification (Office of the National Coordinator for Health Information Technology)
- Built on the Microsoft® Azure® computing platform

Built for Healthcare

- Right place
- Right time
- Actionable

The Healthcare MFP helps you deliver pertinent information at the right time, in the right format and at the point of care to help healthcare providers make critical medical decisions.
