PaperTrail

The Digital Paper Trail

Controlling costs and minimizing waste are critical business objectives - regardless of your industry, the size of your company, or even your job title. When tasked with reducing expenditures and getting 'greener' does gathering printer and MFP usage data come to mind? It should.

PaperTrail provides monitoring of print output on networked Kyocera MFPs and printers as well as copy, scan and fax activity on HyPAS-enabled devices. PaperTrail provides an avenue for you to gather usage data to control costs and minimize waste. In addition to monitoring usage, when using PaperTrail your administrator can set access controls and implement advanced secure printing for your Kyocera MFPs and printers.

- Authorize device and/or device feature usage by individual, department or work group
- Restrict color copies and prints for specified users
- Secure print feature enables users to release their print job at the Kyocera MFP or printer
- Provides detailed reports on all activity on Kyocera devices
- Print and copy jobs can be linked to a business entity (particular case or client) using a reference ID code. This can be used for accounting charge-back purposes
- Track usage for reporting and accounting purposes when combined with Kyocera's Card Authentication solution
- Compatible with all HyPAS-enabled Kyocera MFPs
