

Xerox® ConnectKey™ Share to Cloud

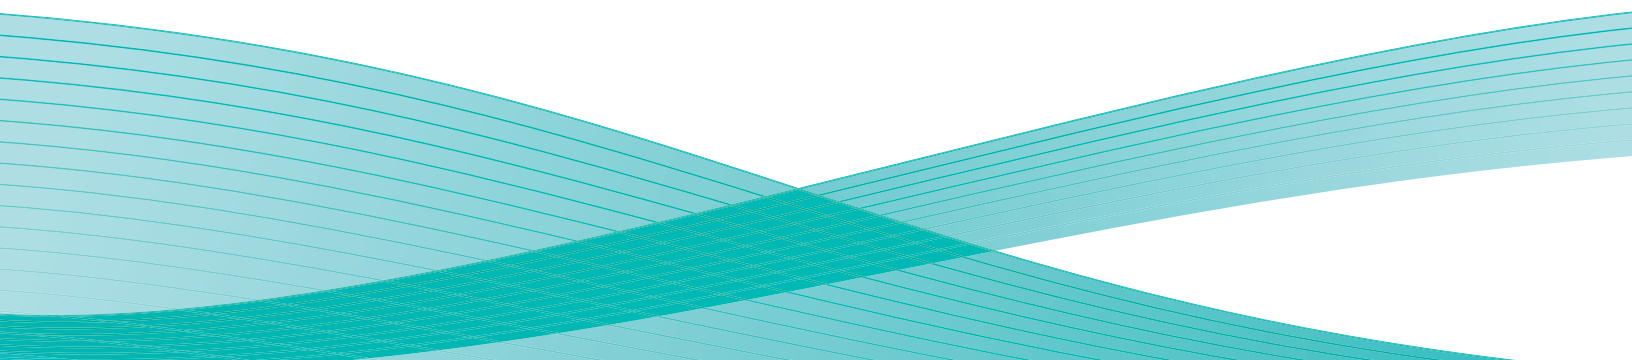

Transform Paper into Editable Information in the Cloud

Capture. Convert. Share Anywhere. Xerox® ConnectKey MFPs and Share to Cloud provide powerful document scanning capabilities with all the benefits of the cloud. This brings simple, secure and anytime access to popular cloud services and email.

Simplicity is what makes it so effective. ConnectKey Share to Cloud delivers all of the benefits of cloud computing to Xerox® ConnectKey MFPs in the same way that apps leverage the cloud on mobile devices. Employees use the intuitive touchscreen on every ConnectKey MFP to scan their documents, and the Share to Cloud solution converts the files and distributes them to the selected cloud service.

Not only does this enable knowledge workers to transfer information once trapped in paper to editable digital content, but it also provides on-the-go access to employees' most important files and documents anytime, anywhere, including access to content from mobile devices.

ConnectKey Share to Cloud is a solution your administrators or IT department will appreciate. Share to Cloud is a serverless MFP application with no on-premise software or hardware required. So busy employees and administrators can work on more important tasks. Share to Cloud reduces their burden by eliminating the need for implementation, maintenance, and support.

Xerox® ConnectKey™ Share to Cloud

Benefits

Share Anywhere – Connectivity to the Cloud

- Enables employees to scan paper documents directly to email or public cloud services
- Connects to the most popular cloud services, including: Google Docs/Drive, Evernote®, Microsoft® SharePoint® Online, Dropbox™, Salesforce.com, Office 365 and Email (via SMTP)
- Gives employees “anytime-anywhere” access to their most important documents using mobile devices

Document Conversion

- Converts scanned documents into fully editable word processing documents, spreadsheets and searchable PDF documents
- Provides automated file splitting and quota notifications to ensure that files reach their desired destination
- Performs OCR in the cloud, eliminating the need to install additional server technology

Reduced Administration and IT Burden

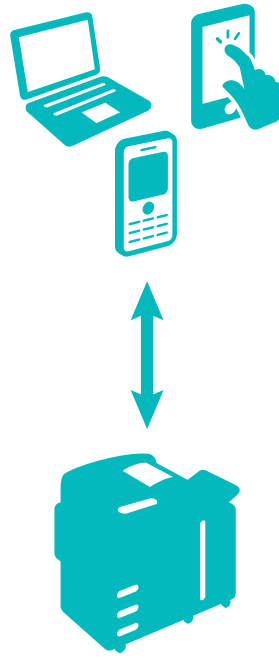

- There is no software to install, no server to maintain, and no software agents to load
- Intuitive user interface at the Xerox® MFP control panel reduces the need for user training

Benchmark ConnectKey Security

- Leverages user credentials from the ConnectKey MFP device login, whether using network credentials, PIN codes or ID cards
- Associates the MFP login credentials with previously entered user cloud service credentials for streamlined workflows
- Encrypts all data communications between the MFP and cloud services using SSL technology to offer complete security and peace of mind

Summary

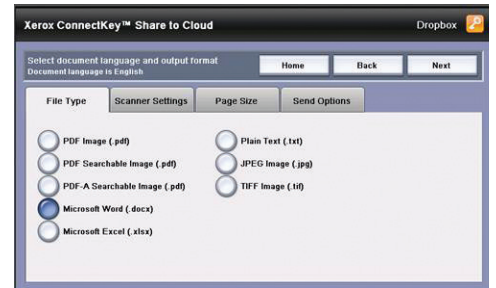

With ConnectKey Share to Cloud, your organization can take advantage of all that the cloud has to offer: mobile access to your most important documents, improved productivity, increased collaboration, and reduced burden on employees and administrators.

Supports popular cloud repositories.

Securely log in on the MFP directly to your preferred cloud repository.

Scan direct from the MFP to Word, Excel, PDF, image or plain text.
